This is the first time I attend the PROCON Programming contest. I am enjoying the contest so much. I think that you help the contest professionally. I am very impressive about that.

The organizing members, specially Tanaka san, Uchida san, and Yagi san, support us so much. I would like to express my regard to them. I also would like to thank NAPROCK for the invitation and support us to attend the contest. Thanks for all of the participants who always support our Team during the contest.

In this contest, we bring a surprised strategy for solving the problem. It makes all of you to be happy and satisfied. This is the best thing that we can do in this contest. We are got the First runner-up price. It is a right place of us because the Kurume Team is very strong. We will try to be number one in next year and bring more and more surprised things. I hope that all of you are happy and satisfied our team.

During the contest, you held many sightseeing activities. They are great opportunities for us to discover and understand Japan culture. I have learned many great things from these events. They help me to explain why Japan is very famous in the world. I like the Japanese garden, the famous temples ... I am also like shopping in the central of Kyoto. Japanese foods are very delicious. I never forget all of above things in my life.

My name is Vu Viet Duc, I come from Ha Noi, Vietnam. Now, I am studying at University of Engineering and Technology - Vietnam National University Hanoi, I am so happy and proud to be one of the representatives of my school competing in Programming contest. In this meaningful trip to your country, I not only studied more but also broadened my knowledge about your beautiful country, especially culture and people of Japan. I knew about the country of Japan a lot before through TV and internet, but when I landed to your country, I am really impressed so much at your country's beauty. The weather was so cold. I guess that it was colder than in Vietnam but I am still alright. For me, Japan is a peaceful, modern and beautiful country. I saw a lot of high modern buildings and blocks in two sides of streets. In the first day, I had a chance to visit some companies. I realized that these companies were very professional and organizing. What about Japanese, I must say that they are really friendly and helpful. What I like most was the tour around the city of Kyoto. Kyoto is a wonderful place to visit. Its beauty and pace of life make me feel this is an active, and very ancient. In the tour around Kyoto, I visited two pagodas. I was glad to know about Japan's culture and religion. To be honest, I was a little bit tired but I was so excited about this tour. It was very meaningful to me. I am going to come back Vietnam tomorrow, certainly I will miss your beautiful country so much. I hope to visit your country in the future.

First of all, I want to say thank you for all. You are amazing. It is very enjoyable to speak with you today about my feeling. Prior to coming here, although I went to with my teacher and my partner but this was my first time abroad so I was very worry. When I arrived in Japan, I felt surprised. Your country is very beautiful and modern. Japanese people is very helpful and I feel very comfortable. You are busy people and have strong traditions. After the programming contest, I went sightseeing and go shopping. It was very interesting. I like trees in your country, very beautiful. Japanese student seems to be timid but in fact, they are very friendly. I added email of some Japanese friends. I will email them as soon as possible when I come back home. Now, It is 3:30 am and in the morning we will check-out and come back Vietnam. Become an expert on computing and go abroad, that is my dream. I hope I can return Japan again someday in the future to study. I love your country. Again, thank you so much.

Sincerely,

Vu Thanh Tu

Mongolia

I really enjoyed this week. Because I had a chance to visit Japanese companies, cultural centers, restaurants and sightseeings. For example, Tenryu-ji Temple was one of the most beautiful places I've ever visited. Even though we had a great schedule with tight timings, Mrs. Tanaka helped us to keep things going smoothly. I found out many good personalities of Japanese people from her. I hope this competition will help Mongolian students to learn and experience more in coming years. Thank you to the organizers. I wish you all the best.

Sincerely B. Batbaatar

B. Adiya.

It was really nice to visit Japan. I really liked traditional food, tea ceremony, people's personalities and sightseeings of Japan. It was really amazing to see how Japanese people do things in time. Thank you everyone and thank you for everything.

A Comment from the Mongolian team's leader Batzolboo

I've just experienced that Japan is ~~one~~ of the leading developed countries in the world, by myself. As I can see, Japanese people love their nature and it is keeping the society clear and natural.

I am very grateful to the company NextWare and Mrs. Tanaka.
~~Now I have you left~~
You gave us lots of nice memory to remember. Also you showed us good aspects of Japanese people. We will try hard to participate successfully next year. If you need anything, I will always be happy to help you.

Sincerely B. Batzolboo

Thank you to our care this past week, you are very friendly, very well done, the following are some tips we have put forward:

1 is recommended to use the same computer configuration PC game

2 exchange students do not group

3 shopping time too short

Lu Yang Chengdu Neusoft Institute

Dec.26.2011

To whom it may concern,

Thank you for helping us a lot during the time we stayed in Japan. This programming contest is the largest and professional one which I have ever taken part in. I'm sorry that I didn't send the suggestion in time. I think this contest is very successful. In my opinions, there are two points that might be helpful for you to hold the next contest.

1. If everyone use the same type computer to compete in the contest, may make the contest better.
2. Give us more time to shopping will be much better.

Best wishes.

Yours Sincerely,
Zhong Zijian.
